

Clarinet in Bb Model 2000: Boxwood with Gold-plated Keywork

This deluxe model was created at the suggestion of clients eager to experiment with other materials – we, too, are open to new ideas! The result was an instrument of well-balanced intonation and a warm and versatile sound. It blends in perfectly with string instruments, bassoons, wooden flutes etc., while preserving a presence and prestige of its own. This came at no surprise neither to us instrument makers nor to musicians who have been appreciating our boxwood period clarinets and know about that timber's wonderful acoustic properties.

Let this noble and precious instrument speak for itself!

The mechanical aspects are identical as the Model 2000 in African Blackwood.

Left hand side: Clarinet in A, Model 1000
Right hand side: Clarinet in Bb, Model 2000
